

**LaSR Required Quantitative Accomplishment categories and metrics (FY20 and newer projects)**

Below are the category and metric options available for reporting into the LaSR system which will be required for all funded LSR projects.

<b>Category</b>	<b>Description</b>	<b>Measure</b>
<b>Economic benefit</b>	Board feet of timber (e.g. sawlogs or small diameter) produced that contribute to the forest products industry.	Board feet of forest products produced (timber)
<b>Economic Benefit</b>	Tons of biomass produced that contribute to the forest products industry.	Tons of forest products produced (biomass)
<b>Hazardous Fuels Management</b>	Acres treated to reduce hazardous fuels including prescribed fire, thinning and other actions that reduce hazardous fuels and mitigate fire risk.	Acres treated to reduce hazardous fuels
<b>Insect and Disease Management</b>	Acres treated for insects and disease including through chemical, mechanical, and biological actions that improve forest health conditions. This does not include acres surveyed.	Acres treated for insects and disease
<b>Invasive Plant / Weed Management</b>	Infested acres treated for invasive plants including chemical, mechanical, and biological actions that improve forest health conditions. This does not include acres surveyed.	Infested acres treated for invasive plants
<b>Landowner Assistance</b>	Private forest landowners reached through technical assistance. Include landowners known to have benefited in some significant and lasting way from the project through more than one interaction. This does not include a landowner who simply attended a technical or training session without any follow-up or were spoken to only once, such as over the phone, with no follow-up.	Private forest landowners reached through technical assistance
<b>Silviculture (forest management)</b>	Number of acres treated exclusive of other treatments already reported in another accomplishment field such fire and/or water quality treatments. This could include timber/forest stand improvements, reforestation, or afforestation associated with a forest management activity.	Acres of silvicultural practice exclusive of other reported treatments
<b>Stewardship / Forest Management Planning</b>	A forest management plan could include a Forest Stewardship Plan; CAP 106 plan, Tree Farm plan, tax abatement plan, equivalent state forest management plan or a landscape plan. If a landscape plan, the plan must focus on discrete/specific geography	Acres under new forest management plans

	such as a watershed and does not apply to a state-wide landscape level plan.	
<b>Water Quality Enhancement</b>	Acres of trees and seedlings planted to enhance water quality including riparian buffers, floodplain restoration and other actions that enhance water quality.	Acres of trees and seedlings planted to enhance water quality
<b>Water Quality Enhancement</b>	Miles of riparian forest treated to enhance water quality including riparian buffer establishment or maintenance and other actions that enhance water quality. This does not include any structural enhancements or construction (e.g. culverts).	Miles of riparian forest treated to enhance water quality
<b>Wildlife Habitat Enhancement</b>	Acres of habitat treated to protect, conserve, and enhance wildlife and fish habitat. Threatened and endangered species that will benefit from project activities should be included in the narrative accomplishments.	Acres of habitat treated to enhance wildlife
<b>Wildlife Habitat Enhancement</b>	Miles of riparian forest treated to protect, conserve, and enhance wildlife and fish habitat. Threatened and endangered species that will benefit from project activities should be included in the narrative accomplishments.	Miles of riparian forest treated to enhance wildlife

Note – All information in the table pulled from the LaSR Reporting Database.
